INDUSTRIAL LED LIGHTING

We produce high-quality and effective LED light sources for industrial purposes!

A wide range of solutions for the industry, manufactured in Bulgaria.

We design the right light sources for your needs

We create trust through quality, based on year-long experience. We do not just provide illumination; we also plan your specific solution. We work with professional and proven 3D design software. We guarantee correct decisions, optimal budget and long operational life.

Manufacture according to European standards

We create high-tech products, applying most recent standards. We bear a distinct responsibility for the quality of our products. We are with you throughout the entire process – with real guarantees, manufacturer servicing, optimisations and renovation in time.

/ASG *Lighting is becoming a long-term and advantageous investment!*

Product quality and control

Quality is our priority: state-of-the-art production machines, elements provided by leading suppliers, workmanship by highly qualified personnel, strict quality control. Thus, we guarantee the excellent result in the final product. Quality control by independent external laboratories is an integrated standard with us.

We produce LED modules and lighting systems for specific projects.

When you have special needs related to lighting, you can rely on us. We have large experience in finding solutions for various industrial sectors. We can renovate and optimise your existing light systems. Our tailor-made solutions are based on scientific experience and they are proven in a number of countries across Europe.

We conduct surveys to optimise energy efficiency.

We can survey, design and select the proper light sources which can meet the illumination standard in any industry with minimum consumption of energy. Thus, the investment is returned very quickly from the saved electricity and the monthly costs remain reduced for many years ahead.
